Cage Assembly Rods for 30mm Cage Systems

- Compatible With 30mm Cage System
- Ø6mm Precision-Ground Stainless Steel
- Stackable End-to-End Design

- Removable #4-40 Stud in Each End
- Available in Lengths Ranging From 1/2" to 8" (13mm to 203mm)

Thorlabs' Cage Assembly Systems provide a convenient way to construct large optomechanical systems with an established line of precision-machined building blocks designed for flexibility and accurate alignment. Among the most essential of these components are the cage plates and 6mm ER Series Cage Assembly Rods.

> The ER Series Rods are most commonly used as precision guides for our 30mm and 60mm Cage Assembly Plates. Precision our line of swivel connectors, couplers, and right-angle rods.

ER Rod Adapter

- Internally Accepts Ø6mm ÉR Series Rods
- #4-40 Threaded Stud
- Easily Add and Remove Components From Cage Assemblies

The ERSCA is an adapter with an internal bore that accepts Ø6mm ER Series rods and an external #4-40 threaded stud that can attach to ER rods or cage compatible components. The adapter will allow a cage assembly to be separated easily when adding or removing components.

Cage Systems

Small Through-Hole Aligned at Center of 30mm Cage Assembly

The CPA1 and CPA2 alignment plates are convenient tools for aligning 30mm cagebased optical systems. These drop-in plates locate a small through-hole at the exact center of a cage assembly, providing a convenient visual beam target to assist in alignment adjustments. The CPA1 provides a Ø1mm through-hole, while the CPA2 provides a Ø5mm through-hole.
